HAL is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L’archive ouverte pluridisciplinaire HAL, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d’enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.
TreeCloud is a tree cloud visualization of a text

TreeCloud builds a tree visualization of a text, which looks like a tag cloud where the tags are displayed around a tree to reflect the co-occurrence distance between the words in the text.

The adjacent grammar cloud gives an overview of Barrack Obama’s 2008 presidential campaign speeches.

Tree construction process
1. Use the Dela entry to build the tree
2. Remove stopwords
3. Use a weighted frequency of the text
4. Use a weighted frequency of the text
5. Build the tree
6. Draw the tree

TreeCloud builds a tree cloud visualization of a text, which looks like a tag cloud where the tags are displayed around a tree to reflect the co-occurrence distance between the words in the text.
